\*\*\*\*\*

The cross country race will be held over the entire race loop. Each loop is 8 miles, and the trail can become quite technical at parts.

The short track will be less technical and faster flowing terrain than the race loop. To keep the course interesting, we incorporated a 75ft climb which overlooks the lake.

The Hill Climb will be run just as it has in the past. The entire conference will meet up together and ride out to the start of the hill climb as a group, then begin staging. Once the referees are in place waves will begin every 3-5 minutes until all are off.

We will keep you updated to any trail changes.
